Form Approved OMB No.  
0704-0188

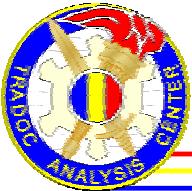

Public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing this collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to Department of Defense, Washington Headquarters Services, Directorate for Information Operations and Reports (0704-0188), 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number. PLEASE DO NOT RETURN YOUR FORM TO THE ABOVE ADDRESS.

# Analysis Mission

# Changing Environment

---

1. Military problem set is different, complicated by an *asymmetric and adaptive adversary*.
2. Military solution set leverages IT, thereby placing more emphasis on *human dimension*.
3. Pace of development of new military concepts requires greater investment of *intellectual capital*.

**Unprecedented Collaboration**  
**Leaders--Warriors--Industry--Developers--Testers**

# The *Calculus* of Operations Analysis

**3rd Order Conclusions**  
based on strongly  
predictive methodologies

- ✓ Full experimental design
- ✓ Controlled variables
- ✓ Certified model algorithms and data, classified if necessary
- ✓ Statistical confidence limits

**1st Order Insights**  
based on quantitative  
and qualitative analysis

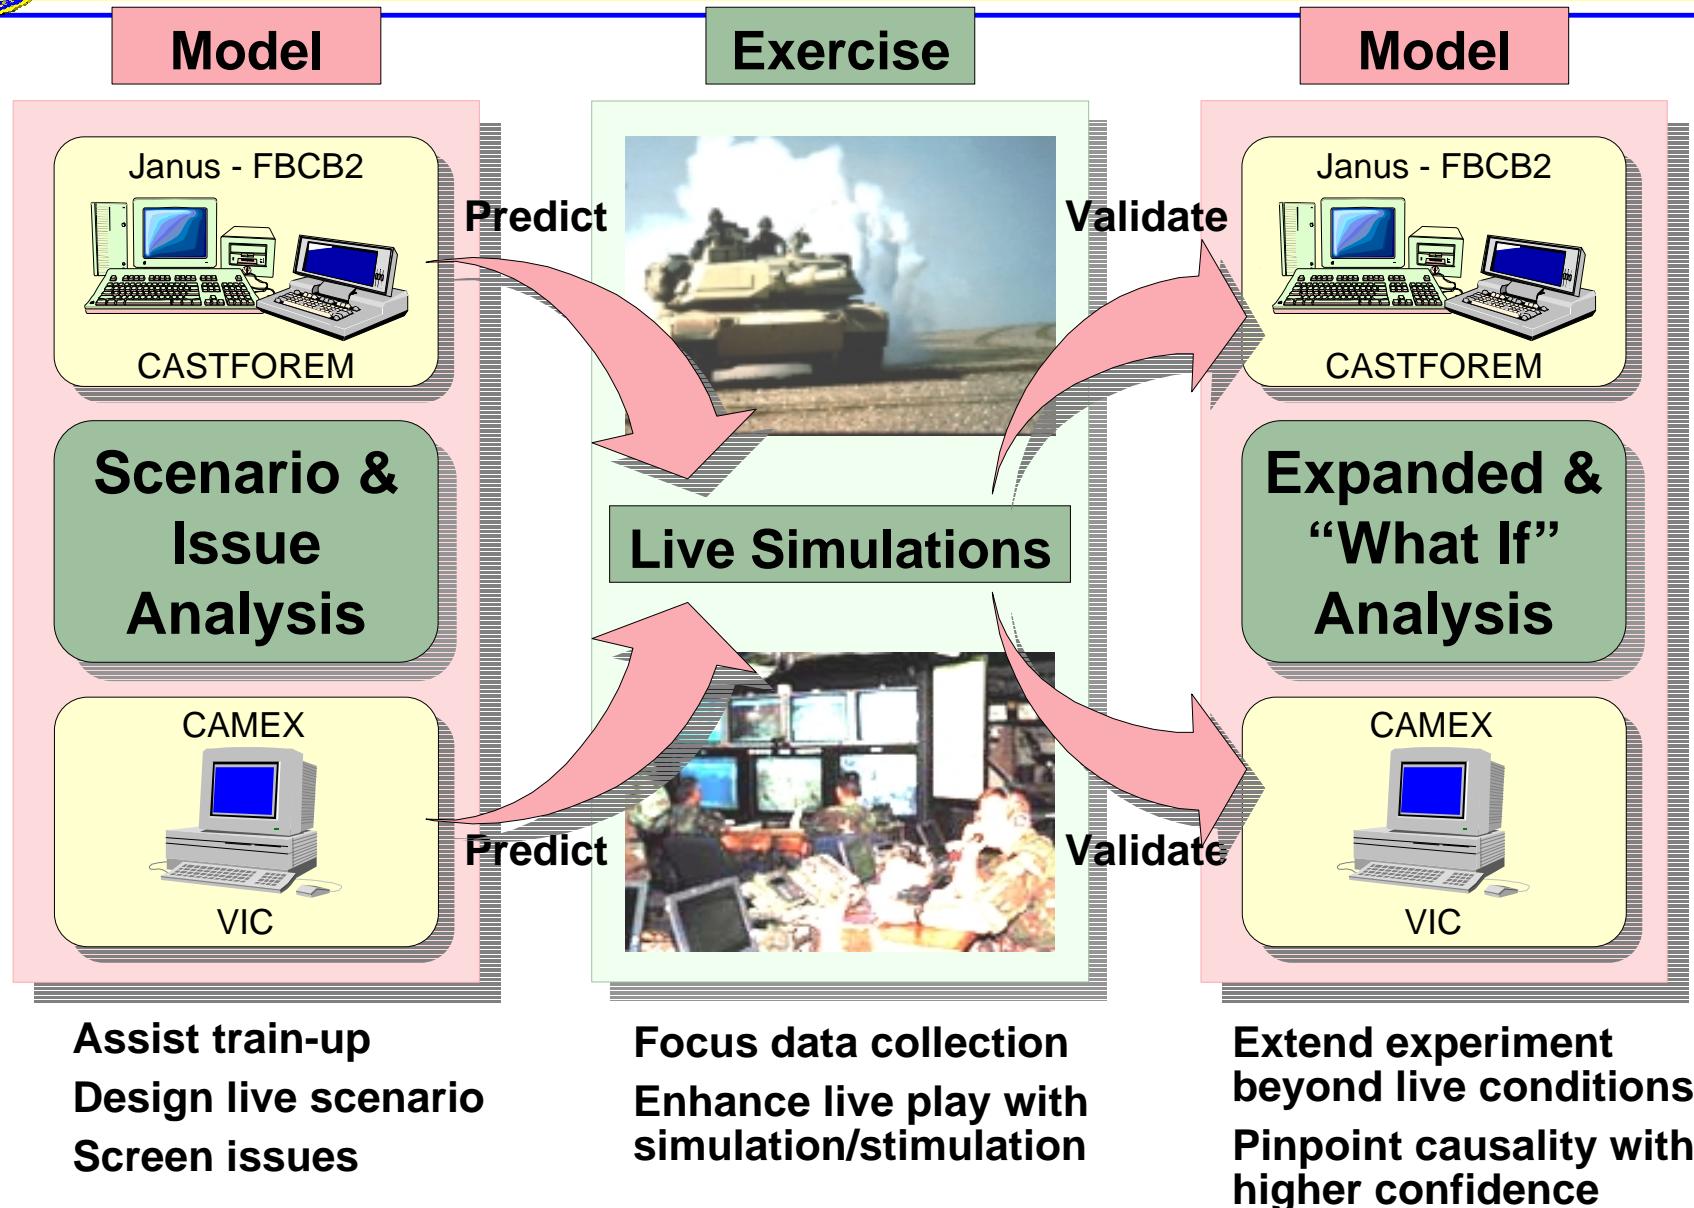

- ✓ Incomplete experimental design
- ✓ Surrogated data
- ✓ Structured exercise AARs and soldier-in-loop simulation results
- ✓ Inferred causality

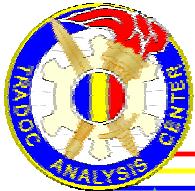

**PMJ**  
Professional Military  
Judgement of SMEs

- ✓ Relevant military experience
- ✓ Operations lessons learned
- ✓ Historical precedent
- ✓ Training AARs

# Modeling Challenges

---

- ✓ Insufficient knowledge base to accurately model operations in urban and complex terrain.
  - Target acquisition and identification.
  - Adjudication of fires.
  - Tactical communication.
  - Human behavior (all sides).
- ✓ Lack of human behavior models (especially for command decision making).
- ✓ Some headway made, but still largely a work-in-progress on methods to model and measure value of information in military ops.

## Infrastructure Roadblocks

---

- ✓ Unable to share sensitive data necessary to create collaborative simulation environments.
  - Proprietary system data
  - Intelligence data (basis of scenarios)
- ✓ Inadequate life cycle management of data for M&S to serve DoD-wide needs.
  - Data generation:* Expansion and leverage of JTCG-ME is promising.
  - Data management:* JDS has potential.
  - Data standards:* “Data dictionary” is DOA.
